Häny Mixing and Injection Technology

Compact Grout Plant IC 311

The combination of proven, standard Häny components – mixer, agitator, and injection pump – results in an extremely compact injection plant. This setup is suitable for a wide variety of applications such as anchor, sleeve pipe, and contact injections.

Compact Grout Plant

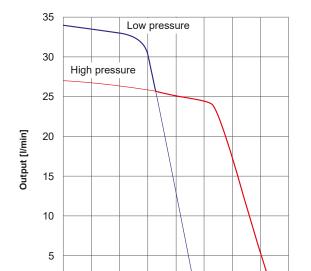

IC 311

Key features

- Extremely compact mixing and injection system with central lifting point for easy transport and minimum installation time
- High productivity due to ergonomically positioned operating elements
- ► High reliability and low-maintenance operation with good accessibility to the wear parts
- Independent of pressure ratios, the suction stroke is always carried out at high velocity in order to flush the valves and to avoid clogging

Typical applications

- ► Grouting of anchors, soil nails, tension cables as well as for sleeve pipe, rock, and contact injections
- ► Preparation and pumping of bentonite suspensions for pipe jacking and microtunneling
