Häny Mixing and Injection Technology

# Compact Grout Plant IC 650/710

The compact grout plants consist of the proven, standard Häny components of a mixer, agitator, and grout pump. This setup is suitable for a wide range of applications such as anchoring, sleeve pipe, contact, and backfill grouting. For higher outputs and increased quality control, the plants are also available in semi-automated and fully automated versions.

### IC 650/710

#### **Key features**

- Pump performance
- Extremely compact mixing and injection system with central lifting point for easy transport and minimum installation time
- ► High productivity due to ergonomically positioned operating elements
- High reliability and low-maintenance operation with good accessibility to the wear parts
- Independent of pressure ratios, the suction stroke is always carried out at high velocity in order to flush the valves and to avoid clogging

#### **Typical applications**

- ► Grouting of anchors, soil nails, tension cables as well as for sleeve pipe, rock, and contact injections
- Preparation and pumping of bentonite suspensions for pipe jacking and microtunneling

#### Included as standard

- · Manual pressure and flow control
- Oil level and temperature sensor

#### Optional

- · Pressure relief valve Grout pump Agitator, manual
- Low pressure control cartridge
